STEEL, NORTH AMERICA SEGMENT

- Sales of flat-rolled products were up YoY due to a spike in demand in 2021 following guick market recovery from the pandemic and limited available supply
- Sales of construction products grew YoY amid strong market demand and because product price growth outpaced that of raw materials
- Sales of tubular products declined overall YoY mainly due to completion of 2020 customer orders earlier in the year. However, OCTG and line pipe markets
 demonstrated strong signs of recovery, which allowed us to restart all our OCTG operations that have been idled since Q2 2020
- There were no sales of semi-finished products in 2021 following the fulfilment of a contract with a key customer in 2020

Supplementary financial information

RASPADSKAYA GROUP DISCLOSURES

The management had concluded that the demerger of the coal business had become highly probable within one year and that Raspadskaya Group met all criteria to be classified as a disposal held for distribution to owners, as discussed in more detail in Note 2 and Note 13 of the EVRAZ consolidated financial statements, as of 31 December 2021. Consequently, in accordance with the requirements of IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations", it was accounted for as discontinued operations in the consolidated financial statements.

During 2021 the Coal business was an integral part of the Group and was managed on this basis. Due to this the analysis presented in this presentation is based on the data disclosed in the Note 3 "Segment information" of the Consolidated financial statements and follow the same logic as in all previous years.

The reconciliation of these results with the amounts presented in the consolidated statement of operations is provided in Note 13. It is limited to the presentation of the results of the coal business as discontinued operations.
